

# President Names Jay Clayton to Lead New White House AI Group

From: NPR World Mined: 2026-10-04 5 min read

President Donald Trump said on Sunday that Jay Clayton is the new White House "**AI czar**." Clayton is the director of national intelligence. Trump announced the news on Truth Social. He said Clayton will lead a new group called the "**Super Intelligence Force**." Trump wrote that the group will "ensure that America continues to lead the World in Super Intelligence." Trump prefers the term "super intelligence" to "artificial intelligence."

According to Trump, the group will coordinate the federal government's work with consumers, public interest groups, religious organizations, companies that run **important systems** like power and water, and super intelligence companies. Trump also named other members. They are Federal Trade Commission Chairman Andrew Ferguson, Office of Personnel Management Director Scott Kapor, and Emil Michael, a defense department official in charge of research and engineering.

The announcement follows warnings from some tech leaders about the risks of fast-moving AI, including worries that it could go rogue. Trump has largely brushed those warnings aside. On Tuesday, he met with AI company leaders at the White House. He said several of them signed a **voluntary agreement** that includes reviews of their work from inside and outside their companies. This week the White House also launched a new website, America.gov, which says its content is gathered by AI from official government sources.

It is unclear what Clayton's new job will mean for the AI industry. Rules from the U.S. government are limited, and **Congress** has not passed a broad law about AI. Some states, including California, have rules, such as requiring that people be told when AI is used. Last month Clayton told CNBC that super intelligence is a **national security** issue. He also disagreed with calls to pause AI development, noting that other countries are continuing their work.

## Word Treasure

**AI czar** -- A person chosen to lead the government's work on AI.

**Super Intelligence Force** -- The new group Trump says Clayton will lead.

**important systems** -- Things a country needs to keep working, like power and water.

**voluntary agreement** -- A deal companies choose to sign.

**Congress** -- The part of the U.S. government that makes laws.

**national security** -- Keeping a country safe.

## Break it down

**Opening:** Clayton named White House AI czar  
The Super Intelligence Force and who it will work with  
Other named members  
Warnings about AI, the Tuesday meeting and America.gov  
What is unclear, current rules and Clayton's view

## Why it matters

The article shows how the U.S. government is organizing its work on AI while rules are limited, and why people are still debating how fast AI should develop.

## Test what you remember

1. Which job does Jay Clayton already hold?
  - (A) Director of the Office of Personnel Management
  - (B) Under secretary of defense
  - (C) Chairman of the Federal Trade Commission
  - (D) Director of national intelligence
2. Who is named as Federal Trade Commission Chairman in the group?
  - (A) Emil Michael
  - (B) Jay Clayton
  - (C) Andrew Ferguson
  - (D) Scott Kapor
3. What new website did the White House launch this week?
  - (A) CNBC.com
  - (B) TruthSocial.com
  - (C) America.gov
  - (D) SuperIntelligence.gov
4. What does the voluntary agreement include?
  - (A) A pause in all AI research
  - (B) Free computers for schools
  - (C) A ban on all new AI tools
  - (D) Reviews of the companies' work from inside and outside
5. What does the article say about U.S. rules for AI?
  - (A) They were written by AI companies
  - (B) They have been in place for decades
  - (C) They are strict and cover every company
  - (D) They are limited and Congress has not passed a broad law
6. How did Clayton respond to calls to pause AI development?
  - (A) He said nothing about it
  - (B) He agreed and asked for a pause
  - (C) He asked Congress to ban AI
  - (D) He disagreed, saying other countries are continuing their work

Answer key (try the quiz first!): 1: D 2: C 3: C 4: D 5: D 6: D

1. **President Trump:** Says the group will help America lead the world in super intelligence.
2. **Some tech leaders:** Have warned about the risks of rapid AI development, including worries that it could go rogue.
3. **Jay Clayton:** Called super intelligence a national security issue and disagreed with calls to pause AI development.
