Younger Kids Feel Excited About AI Stories, Study Says

From: IndieWire Mined: 2026-10-22 3 min read

How do kids feel when they watch videos or stories made with **artificial intelligence**, or AI? A new **study** says it depends on how old they are.

The **study** came from UCLA and the Center for Scholars and Storytellers. It asked young people ages 10 to 24.

More than half, 53.8 percent, said AI stories made them feel "**fascinated**" or "excited." About 32.1 percent felt "doomed" or "scared."

Younger kids felt better about AI. Only 9.7 percent of 10- to 13-year-olds picked "doom." Nearly half of them felt excited. Older teens and young adults picked "doom" more often.

Many of these feelings come from silly AI videos on **social media**, like clips of talking fruit.

One 13-year-old said AI should be shown in a fair way, with both good sides and risks.

The **study** also found that more than half of young people would most like to see a movie in a theater with friends.

Word Treasure

artificial intelligence -- Artificial intelligence is computer technology that can make things like videos and stories.

study -- A study is careful research to learn about something.

fascinated -- Fascinated means very, very interested.

social media -- Social media are apps and websites where people share posts and videos.

Background you need

Artificial intelligence, or AI, can now make videos and stories that many people see online.

Researchers ask people questions to learn how they feel about new things.

Comparing answers from different ages shows whether feelings change as people grow up.

Break it down

WHO: Researchers at UCLA and the Center for Scholars and Storytellers and young people ages 10 to 24

WHAT: A study found younger kids feel more excited about AI stories than older teens and young adults

WHERE: Across the United States, based on AI videos seen on social media

WHY: Many feelings about AI come from silly AI videos people see online

Why it matters

Thinking about how AI videos make you feel can help you use them wisely.

Test what you remember

1. Who made the study?

(A) A sports team
(B) A zoo
(C) A toy company
(D) UCLA and the Center for Scholars and Storytellers

2. What ages were asked?

(A) 10 to 24
(B) 50 to 70
(C) 30 to 40
(D) 1 to 5

3. How many felt fascinated or excited?

(A) 53.8 percent
(B) 100 percent
(C) 10 percent
(D) 1 percent

4. Which group picked "doom" the least?

(A) Older teens
(B) Young adults
(C) Grandparents
(D) 10- to 13-year-olds

5. What silly AI videos are mentioned?

(A) Talking fruit
(B) Flying cars
(C) Singing dogs
(D) Dancing trees

6. What do many young people most want to do with friends?

(A) Clean their rooms
(B) See a movie in a theater
(C) Go to the dentist
(D) Do homework

Answer key (try the quiz first!): 1: D 2: A 3: A 4: D 5: A 6: B

Questions to think about

1. A 13-year-old in the study: Said AI should be shown fairly, with both good sides and risks.

MY THOUGHTS (at least 20 words):
