

Pictures of Phil Tippett's Movie Work Appear Online

From: Kotaku Mined: 2026-10-04 3 min read

Pictures and videos showing how special-effects artist Phil Tippett helped make films have appeared on the Internet Archive. News about the **collection** spread during the week before October 4, 2026. A social media post shared the news on October 1.

Tippett and his team worked on Star Wars, Jurassic Park and RoboCop. He is known for **stop-motion animation**, which makes models of imaginary creatures seem alive. An artist moves an object a little between photographs. When the photographs play in order, the object seems to move.

The **collection** seems to come from a folder of CDs. An unnamed fan bought them at a sale after Tippett's studio in Berkeley, California, closed in August 2026. The buyer said some of the material was not online. They wanted to save its clear, fine detail. They copied the contents and **uploaded** files from 90 different discs.

The Star Wars pictures show work on the cantina scene in A New Hope. They also show puppets, stop-motion creatures and the film's small holographic chess figures.

Other files show work on RoboCop and surface details for creatures from Hellboy. There are also computer models from Jurassic Park shown as a network of lines. The **collection** includes photographs from animator Ray Harryhausen's 90th birthday, too.

Tippett's studio has closed, but he has said he is not quite ready to **retire**.

Word Treasure

stop-motion animation -- Making an object seem to move by moving it a little between photographs.

collection -- A group of things gathered together.

uploaded -- Put files online.

retire -- Stop working.

Break it down

Opening: Pictures and videos of Tippett's film work appear online.

Explanation: Stop-motion animation makes objects seem to move.

Source: An unnamed fan appears to have bought and uploaded the CDs.

Examples: The files show work on several films and birthday photographs.

Ending: Tippett says he is not quite ready to retire.

Why it matters

The collection lets readers see some of the work behind movie creatures and effects.

Test what you remember

1. Where did the pictures and videos appear?

- ☐ (A) On the Internet Archive
- ☐ (B) In a school library
- ☐ (C) At a birthday party
- ☐ (D) In a cinema

2. How does stop-motion animation make an object seem to move?

- ☐ (A) An artist draws it on a CD.
- ☐ (B) An artist moves it a little between photographs.
- ☐ (C) An artist films it without stopping.
- ☐ (D) An artist shines a light on it.

3. When did Tippet's Berkeley studio close?

- ☐ (A) October 4, 2026
- ☐ (B) August 2026
- ☐ (C) October 1, 2026
- ☐ (D) During Ray Harryhausen's birthday

4. Who seems to have bought the CDs at a sale?

- ☐ (A) An unnamed fan
- ☐ (B) A Jurassic Park creature
- ☐ (C) Ray Harryhausen
- ☐ (D) Phil Tippet's whole team

5. How many different discs did the uploaded files come from?

- ☐ (A) 90
- ☐ (B) 4
- ☐ (C) 1
- ☐ (D) 26

6. What has Tippet said about retiring?

- ☐ (A) He retired before his studio closed.
- ☐ (B) He is not quite ready.
- ☐ (C) He retired on October 1.
- ☐ (D) He will retire on his 90th birthday.

Answer key (try the quiz first!): 1: A 2: B 3: B 4: A 5: A 6: B

Questions to think about

1. The buyer: The buyer wanted to save the clear detail of material they said was not already online.
2. Phil Tippett: He has said he is not quite ready to retire, even though his studio has closed.

MY THOUGHTS (at least 20 words):
