This iPhone App Turns Your Lost Scrolling Hours Black

From: Wired Gear Mined: 2026-10-31 3 min read

Your phone can quietly eat up hours. A new iPhone app called Oh My Hours tries to show that lost time. It turns each day into a row of circles, with one circle for every hour. If you spend time in an app you picked as a **distraction**, that hour's circle turns black.

You choose the **distractions** yourself. You can pick whole groups, like social media apps and games, or pick apps one by one. By **default**, even a few seconds in a distracting app can mark the whole hour as lost. A looser rule could **tempt** you to sneak in a little scrolling after each hour resets.

You can start using Oh My Hours for free on **iOS**. There is no sign of an Android version yet. Paying $10 a year or $20 for **lifetime** access lets you change the rules and see month and year views. You can also set quiet hours and reset an hour marked by mistake. One glance at the black circles shows whether the day went to scrolling, or to something better.

Word Treasure

distraction -- A distraction is something that pulls your attention away from what you are doing.

default -- By default means what happens unless you change the setting.

tempt -- To tempt someone means to make them want to do something even when they should not.

lifetime -- Lifetime means lasting for your whole life, or for as long as something exists.

iOS -- iOS is the software system that runs on an iPhone.

Background you need

A phone app can keep track of how time is spent, turning each hour into a simple picture that is easy to see at a glance.

People choose the apps that distract them, like social media apps and games, so they can notice when scrolling takes over time meant for other things.

Seeing lost time in a clear way can help people make a different choice about how they spend their day.

Break it down

WHO: iPhone users who choose Oh My Hours and pick their own distracting apps

WHAT: A new iPhone app that turns each day into a row of hour circles and marks a circle black when time goes to a chosen distraction

WHERE: On an iPhone using iOS, with no sign of an Android version yet

WHY: To show how much time is quietly lost to scrolling, so one glance can show whether the day went to scrolling or to something better

Why it matters

It can help you notice when games or social media are eating up time you could spend playing, reading, or doing homework.

Test what you remember

1. What does each circle in Oh My Hours stand for?

- (A) One minute of scrolling
- (B) One app on the phone
- (C) One whole week
- (D) One hour of the day

2. What happens to an hour's circle if you spend time in an app you picked as a distraction?

- (A) That hour's circle turns black
- (B) Nothing changes
- (C) The app is deleted
- (D) The phone locks for a day

3. How can you choose your distractions?

- (A) Only from a fixed list you cannot change
- (B) Only by picking one app at a time
- (C) By asking the phone to guess
- (D) By picking whole groups, like social media apps and games, or by picking apps one by one

4. By default, how little time in a distracting app can mark the whole hour as lost?

- (A) Even a few seconds
- (B) Ten minutes
- (C) Half an hour
- (D) A full hour

5. What is true about Oh My Hours on Android?

- (A) It is free only on Android
- (B) Android users get month views for free
- (C) It costs $20 on Android
- (D) There is no sign of an Android version yet

6. What does paying $10 a year or $20 for lifetime access let you do?

- (A) Change the rules and see month and year views
- (B) Get a new phone
- (C) Give every app a different color
- (D) Play unlimited free games

Answer key (try the quiz first!): 1: D 2: A 3: D 4: A 5: D 6: A
