James Gunn Likes a Fan's DC Timeline

Keeping track of **superhero** movies can be hard. Now a fan has made it easier. A fan called comicbookcollide posted a list of DC movies and TV shows on **Threads**. The list puts the stories in order, like a **timeline**. James Gunn, one of the bosses at DC Studios, replied, "**Timelines** give me **anxiety**, but I think this is pretty good." That is high praise from the man in charge, though he did not call the list fully **official**. The **timeline** puts the new movie "Clayface" second, with its story set in 2021. It also includes "Blue Beetle," a 2023 movie. Gunn has said "Blue Beetle" counts as part of the new DC Universe. The **timeline** puts it in 2023, just before "Creature Commandos" Season 1, the first **official** DC Universe show. Gunn has been careful not to say the **timeline** is 100% right. He says "Blue Beetle" needs a few small changes, called **retcons**, to fit. The same is true of "Peacemaker" Season 1.

Word Treasure

timeline -- A timeline is a list of events in the order they happened.
retcons -- A retcon is a small change to a story so it fits with newer stories.
Threads -- Threads is a social media app for sharing short posts.
superhero -- A superhero is a hero with special powers in stories.
official -- Official means approved by the people in charge.
anxiety -- Anxiety is a worried feeling.

Background you need

DC makes superhero movies and shows, like Superman.

A timeline lists story events in the order they happen.
