Fall Back! Daylight Saving Time Ends on November 1

From: DOGOnews Mined: 2026-10-23 3 min read

Good news! On Sunday, November 1, 2026, millions of people in North America will get a **bonus** hour. Clocks go back by one hour. This ends **Daylight Saving Time** (DST) for this year and gives the weekend an extra 60 minutes.

The change also brings more sunlight into the morning. That should make it a little easier to wake up for school or work during the shorter winter days. This year, DST began on March 8.

Why do we change the clocks at all? The idea started during World War I. In 1916, the German **Empire** moved clocks forward to save fuel, and the United States and Britain copied the idea. Later, the rules became messy. By 1965, one state, Iowa, had 23 different sets of dates! A 1966 law, the **Uniform Time Act**, set one schedule for the whole country.

Since 2007, DST has run from the second Sunday in March to the first Sunday in November. About 70 countries use some form of it. So remember: fall back, and enjoy the extra hour!

Word Treasure

Daylight Saving Time -- The practice of moving clocks forward in spring and back in autumn so the day has more light in the evening.

Empire -- A large group of countries or lands all ruled by one leader, such as an emperor.

Uniform Time Act -- A United States law that gave the whole country one shared schedule for changing the clocks.

bonus -- Something extra that you get on top of what you normally have.

Background you need

Daylight Saving Time is a system where everyone moves their clocks forward in spring and back again in autumn. Moving the clocks changes which hours are light, giving people longer light evenings in summer and brighter mornings in winter. The idea began as a way to save fuel, and a law later gave the whole country one schedule so the clock-change dates would be the same everywhere.

Break it down

WHO: Millions of people in North America who use Daylight Saving Time
WHAT: Clocks go back by one hour, ending Daylight Saving Time for the year and adding a bonus hour to the weekend
WHERE: Across North America, including the United States
WHY: The change brings more sunlight into winter mornings, and the system grew from a fuel-saving idea that later needed one shared national schedule

Why it matters

The clock change gives you an extra hour in your weekend, and brighter mornings can make waking up for school a little easier.

Test what you remember

1. What will happen to the clocks on November 1?

- (A) They will go back by one hour
- (B) They will stop for one hour
- (C) They will go forward by one hour
- (D) They will not change at all

2. What extra thing do people get when the clocks go back?

- (A) A shorter school week
- (B) An extra day of holiday
- (C) A later sunset
- (D) A bonus hour

3. Why did the German Empire first move its clocks forward in 1916?

- (A) To start a new calendar
- (B) To save fuel
- (C) To confuse other countries
- (D) To make mornings darker

4. What was the problem in Iowa by 1965?

- (A) It refused to change its clocks
- (B) It changed its clocks every week
- (C) It had no clocks at all
- (D) It had 23 different sets of clock-change dates

5. What did the Uniform Time Act of 1966 do?

- (A) It moved the clocks by two hours
- (B) It set one schedule for the whole country
- (C) It gave every state its own dates
- (D) It ended Daylight Saving Time forever

6. Since 2007, when does Daylight Saving Time end each year?

- (A) On the second Sunday in March
- (B) On the first Sunday in November
- (C) On the last Sunday in October
- (D) On the first day of winter

Answer key (try the quiz first!): 1: A 2: D 3: B 4: D 5: B 6: B
